

Meltingpot

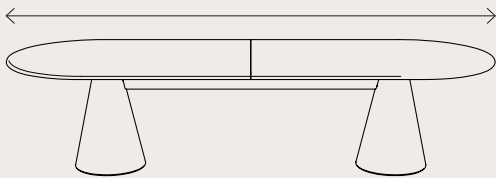

Made to order

KOOIJ

The Meltingpot table offers a third life to recycled plastic prototypes and color tests from the Kooij studio. Our in-house colorist composes a table from precious, fleeting resources. Each piece is a one-off interaction between intuition, material, and chance. Please find our data sheets for sizing and weight.

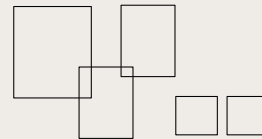

1. ORDER

For our tables ranging from 9P to 16P, we offer custom pressings. After agreeing on the offer and shipping options, we ask for a 50% down payment to confirm your order.

2. MOODBOARD

We invite you to share a moodboard with Meltingpot examples or other inspirations. Our colorist will develop a custom palette based on your input and the available materials..

3. WE MAKE THE FIRST SHEET

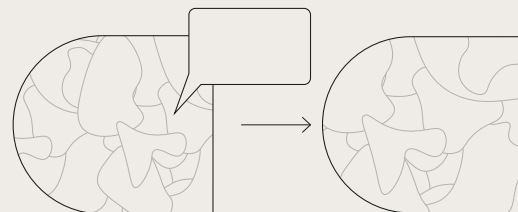

Our colorist carefully gathers materials and synthesizes your moodboard into the first pressing. We will send you photos of the entire sheet with the possible cutout determined by our colorist.

Timespan: ≈ 3/4 weeks

4. FEEDBACK

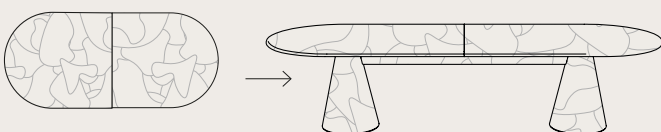

Since this first pressing will serve for the beam of the table, we can offer another pressing with minor adjustments to the coloring if necessary.

5. PROCEED WITH PRODUCTION

After agreement on the offer, coloring, and final finish, the lead time for the table is approximately three months. When the production is completed, we will contact you with photos of the final result.

Timespan: ≈ 3 months

6. SHIPPING

After the remaining balance is settled, the table is packed and ready for pickup by you or our logistics team.
