

Meltingpot

Custom Color Order Process

9P to 18P stadium dining tables

A custom color Meltingpot dining table is a collaboration between you and our colorist. Guided by your colour direction, our colorist develops a palette that is entirely unique to your table. Our colorist composes your table from precious, carefully selected recycled materials and pressed into a single sheet, shaped into a table, and finished by hand. Each piece is a one-off interaction between intuition, material, and chance. Below is a clear overview of the process, from your first enquiry to delivery, so you know exactly what to expect at every stage.

CUSTOM SIZES

Custom coloring is available for Meltingpot stadium dining tables ranging from 9P to 18P. Smaller table sizes are not available for customisation.

TIMELINE

Lead time after the test sheet is approved: 3 months.

1 ENQUIRY & OFFER

We invite you to share the size you have in mind along with your invoice and delivery addresses. We will prepare a full offer covering the table, shipping, import duties, and payment terms.

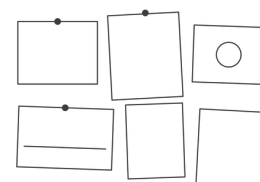

2 ORDER CONFIRMATION & 50% DOWN PAYMENT

A 50% down payment confirms your order and reserves your place in the production schedule. From here, the process begins.

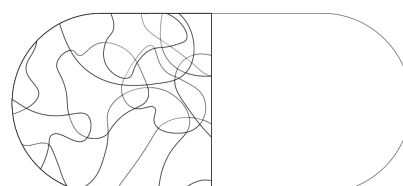

3 MOODBOARD

We invite you to share a moodboard with images of Meltingpot tables you are drawn to, colour references, or any visual material that helps our colorist understand your colour direction. This is the starting point for a palette developed around your vision.

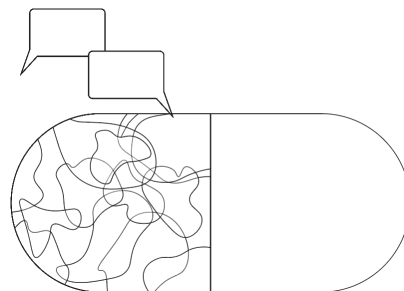

4 FIRST SHEET PRESSED

Our colorist studies your moodboard, selects the materials, and presses the first sheet. This sheet is a compressed layer of recycled materials that will become the tabletop of your Meltingpot. Once the sheet is complete, we send you photographs of the full sheet for your review.

5 FEEDBACK

You share your thoughts on the sheet. If minor adjustments to the colouring would bring it closer to your vision, we can offer one additional pressing with minor adjustments to the coloring. Larger changes in direction are not possible at this stage, as each pressing uses precious and finite materials.

6 PRODUCTION

Once you approve the colouring, the sheet is cut into the shape of your chosen Meltingpot. The legs and beam are then produced. As a last step, all parts of the table are sanded and polished by hand. The entire process requires time and attention throughout. Lead time from approval is approximately three months. When your Meltingpot table is complete, we send you photographs.

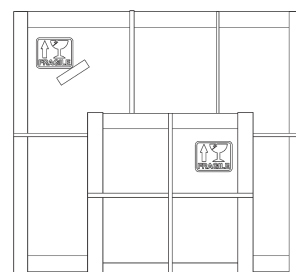

7 FINAL PAYMENT

The remaining 50% balance is settled before shipping.

8 PACKING & SHIPPING

Your Meltingpot table is carefully packed and prepared for its journey. You are welcome to arrange collection with your own shipper, or our logistics team will coordinate delivery for you through one of our specialist transport partners.
